DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim 9, drawn to a medicated polyurethane foam.

Group II, claims 1-8, drawn to a method for forming a polyurethane foam.

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature among the inventions is the medicated polyurethane foam (Group I), which is not implicitly tied to the method of Group II. Specifically, instant claim 9 recites a medicated polyurethane foam *obtainable* by a process according to claim 6. Thus, any medicated polyurethane foam reasonably able to be produced by the method of claim 6 reads on this claim. Such a medicated polyurethane foam is clearly disclosed by Palinczar *et al.* (U.S. Patent No. 4,339,550; Issued Jul. 13, 1982; First reference on IDS dated Jul. 31, 2006), who disclose polyurethane foams containing active materials (i.e. medicated polyurethane foams) (abstract). It is noted that the foams disclosed by Palinczar *et al.* are formed by reaction of isocyanate-capped prepolymers with an aqueous component (column 3, lines 26-27; column 6, lines 32-35), and are thus

obtainable by the method of instant claim 6. Because the foam of instant claim 9 is not required to depend on the process of Group II, the groups do not share a common special technical feature as defined under PCT Rule 13.2, Part I (a). Thus, the Groups do not share a common special technical feature and are subject to restriction.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

5. In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not

Art Unit: 4161

commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
